

GRANT SUPPORT

FACILITATING RESEARCH IN CLA

SERVICES PROVIDED

- Targeted funding searches for your research project, concept, or scholarly pursuits
- Proposal development/writing support
- Budget and budget narrative development
- Connecting you with like-minded scholars to collaborate on projects

THE PROCESS Q&A

How do I initiate a request?

Complete this [form](#), which will notify the CLA Research team of your grant needs and research or scholarly interests. A member of the CLA Research team will respond to your request within 24 hours to discuss the next steps.

What happens after well-matched funders or grant opportunities are identified?

When funders are identified, barring any terms that would make grant funding difficult to pursue (for example: extensive cost sharing), you have made an implicit commitment to submit a proposal for funding. This ensures that the CLA Staff members' time has been appropriately utilized. At this point, you will continue to work closely with CLA Staff to prepare and submit the proposal.

Will CLA Research staff write my proposal?

CLA can provide basic grant writing assistance for the project specific components of your proposal. The degree of assistance will depend on the complexity of your specialty and project.

What other proposal development support will be provided during the application stage?

- Proofreading
- Ensuring compliance with sponsor guidelines
- Preparing the proposal in the funder's specific application system or Temple's eRA@TU system
- Preparing administrative components of your proposal (budget, budget narrative, etc.)
- Obtaining required University approvals

What is a collaborator search and how do I initiate one?

If you are interested in collaborating on your project-within or outside of your specialty or someone within or outside of Temple- we can assist to locate potential collaborators. To initiate this request, use the funding search request [form](#) and check the relevant box to indicate your request for a collaborator search. Collaborator searches can be conducted either independently of or in conjunction with a funding search.
